

## TECHNICAL DATA SHEET

Information for pest control technicians, agronomists, physicians, veterinarians, and Health authorities

# ACTIFUM 14-P

Health Ministry Registration #18840

### FUMIGATING INSECTICIDE FOR PROFESSIONAL USE

#### **Composition:**

100 g product content:

Permethrin 25/75	14 g	
Co-formulants	q.s. for	100 g

#### **Characteristics**

ACTIFUM 14-P is formulated with a special mixture that burns slowly without flame, and produces a thick white and persistent smoke that contains the active principle. ACTIFUM 14-P is a Permethrin-based fumigating insecticide.

#### **Application field**

ACTIFUM 14-P acts by direct contact against flying and creeping insects, and it is suitable for treatments in civil and industrial environments, like holds and warehouses (except food warehouses), tobacco warehouses (provided they are empty when treated), raw material warehouses, industrial buildings, basements, spaces under staircases, attics, containers, vans, etc.

#### **Instructions and doses**

Seal the room to be treated as tightly as possible, lock windows and doors. Place the fumigating jar on a refractory stone, like a brick, or a metal plate. Never place it in a closed space like a bucket.

Since several jars must be used, they must be spaced out in the room as indicated below, according to the treated volumes.

Light the jars one after the other, starting from the jar placed farther from the exit and proceeding toward the exit. Let fumigation continue for not less than 3 hours, then the room must be ventilated, opening all doors and windows.

#### Treated volumes by a 30 g jar:

Flies, mosquitoes, wasps, blowflies, and gnats:

up to 220 m<sup>3</sup>

Lasioderma, Plodia and Ephestia (adults):

up to 110 m<sup>3</sup>

Beetles, ants, tribolii (if not particularly nested):

up to 55 m<sup>3</sup>

This dose of treatment is effective also against spiders, fleas and bugs.

#### Treated volumes by a 60 g jar:

Flies, mosquitoes, wasps, blowflies, and gnats:

up to 440 m<sup>3</sup>

Lasioderma, Plodia and Ephestia (adults):

up to 220 m<sup>3</sup>

Beetles, ants, tribolii (if not particularly nested):

up to 110 m<sup>3</sup>

This dose of treatment is effective also against spiders, fleas and bugs.

#### **Packaging:**

- 30 g jar in 6 pcs boxes COD 1-685-1-30
- 60 g jar in 10 pcs boxes COD 1-685-1-60
