CHIROTOX

Registration of the Ministry of Health n. 14748

VERSATILE INSECTICIDE FOR ENVIRONMENTAL USE CONCENTRATE EMULSIFIABLE IN WATER DOMESTIC AND CIVIL USE

Composition

100 grams of products contain:

Tetramethrin (95%)	5 g (54,3 g/l)
Piperonyl Butoxide (80%)	5 g (54,3 g/l)
Co-formulants	q.s at 100 g

Characteristics

CHIROTOX is an environmental insecticide very stable to heat and light with almost no residuality; its knock down action is rapid and complete thank to the presence in its formulation of piperonyl butoxide with remarkable synergist properties.

Application field

The effectiveness of CHIROTOX occur against: cockroaches, fleas, ants, mosquitoes, tiger mosquitoes, flies, wasps, chironomids, silverfishes, skin beetles, weevils, horseflies, blackflies, moths, flour beetles, lasioderma, ticks, termites. Use CHIROTOX disinfest: urban agglomerations, boulevards and urban parks, suburbs, houses, schools and nurseries, gyms, barracks, cinemas, theatres, waiting rooms of station and airports. Resorts, campgrounds. Canteens, hotels, restaurants. Hospitals, nursing homes, retirement homes, etc.. Warehouses and storage of food goods. Warehouses and premises used for the production of cigarettes and tobacco stowage. Industrial environments in general. Zones and port facilities, transport facilities.

Direction and doses of use

To get a quick and final pest control is advisable to use CHIROTOX at 0.5-1% (500-1000 ml per 100 litres of water) by applying it in areas where insects find an easy refuge including: cracks, fissures, crevices of floors and walls, doors and window frames.

For external treatment suggests a final dilution of 2% (2 litres of concentrate in 100 litres of water), then distribute the emulsion obtained at a rate of 1 litre per 10-15 square meters of surface, depending on the degree of the infestation in place.

Packaging

- Bottle of 1 litre in boxes of 6 pieces
- Tank of 10 litres
