CLOROBLEU

Ministry of Health Registration # 15747

READY-TO-USE RODENTICIDE BAIT EXTERMINATES MICE AND RATS BY ONE INGESTION FOR DOMESTIC AND CIVIL USE

Composition:

100 g product content:

Pure chlorophacinone		0.005 g
Denatonium benzoate		0.001 g
Appetizing and baiting substances	q.s. for	100 g

Characteristics

CLOROBLEU is a ready-to-use rodenticide bait for domestic and civil use. It exterminates all species of mice, rats, field voles, etc. CLOROBLEU poisoning by ingestion causes internal hemorrhage inducing death within a few days, without alerting the other rodents to the bait, thus allowing a complete rodent extermination. Once poisoned, even by a single ingestion, mice and rats feel suffocating and tend to die outdoors. CLOROBLEU contains denatonium benzoate as bittering component in order to minimize the risk of children and non-target animals' ingestion.

Application field

CLOROBLEU is a ready-to-use rodenticide bait for domestic and civil use. It exterminates all species of mice, rats, field voles, etc. .

Instructions and dosage

Mark the area to be treated carefully.

CLOROBLEU is a ready-to-use bait. For its use place 30 – 50 g of the bait in a suitable container in those places where rodents' presence is most likely: houses, warehouses, sewers, gutters, drains, livestock farms, etc. Replace the used bait until mice and rats have disappeared completely. Dead rodents must be frequently removed from the area, and their carcasses shall be disposed of in a safe way and not in litterbins or in dumps.

Packaging:

- Bags in 20 kg boxes
- Bags of fresh paste in 20 kg boxes
- Bags of fresh paste in 5 kg boxes
- 20 kg flake bags
- 5 kg flake bags
- Wax sticks with hook for sewers: 25 kg bags
- Wax sticks for Ristoramatic
- Wax lumps
